

## ALTERNATE SOLUTION UNDER THE BUILDING CODE

The New Brunswick Building Officials Association is excited to present its latest seminar in the one day “Hot Topic” series: Alternate Solutions Under the Building Code”. This session includes highlights on the design, review and approval of alternate solutions and is geared towards everyone in the design community. Building officials, architects, engineers, technologists, and project managers will come away with a better understanding of how the alternate solution procedure works, ensuring an efficient, cost effective process that maintains the minimum safety requirements of the code. Seminars will be presented by R J Bartlett Engineering Limited, The Town of Quispamsis, Building Inspection Department and The Office of the Fire Marshal.
