NBBOA Core Course Curriculum

The Education Committee provides the following core courses and exams which are required to obtain qualification:

Level I

The House Outline	
ACBOA Exam 1 BUILDING ENVELOPE	.2
ACBOA Exam 2 HEALTH AND SAFETY	.5
Legal	

 \rightarrow NBBOA Legal Exam**

Communications

→ NBBOA Communications Exam**

<u>Level II</u>

Part 9 Small Buildings Outline	
\rightarrow ACBOA Exam 3 HVAC AND FIRE PROTECTION	8
\rightarrow ACBOA Exam 4 STRUCTURAL	10
\rightarrow ACBOA Exam 5 PLAN REVIEW	14

Barrier Free Requirements

→ NBBOA Barrier Free**

Level III

Part 3 Large Buildings Outline	
\rightarrow ACBOA Exam 6*10	6
\rightarrow ACBOA Exam 7*10	ô
\rightarrow ACBOA Exam 9*18	8
Part 3 Complex Buildings Outline	
\rightarrow ACBOA Exam 8*1	7
\rightarrow ACBOA Exam 10*19	9

*ACBOA exams are provided separately from the course with a cost of \$225 plus tax ** NBBOA Exams are provided on the last day of the course by the NBBOA of no additional charge

Questions for tasks that are shaded appear on Level 1, Exam 2 - Health and Safety.

	Level I, Exam 1 - BUILDING ENVELOPE EXAM Two & half hour time limit, 50 multiple choice questions, open book.	# of Questions
01		4
	General Administrative Requirements (Content Area)	4
0101	Application (Task Area) Answer general administration questions about the application and interpretation	2
	of the code, inspections, plans, specifications, professional design and review.	2
0102	Materials (Task Area)	
0102	Identify the suitability and use of materials according to the listing and labeling	1
	and approved installation methods.	•
0103	Structural Requirements (Task Area)	
	Verify conformance with structural requirements including snow loads,	1
	deflections, and foundation conditions.	
02	Rooms, Spaces, Doors and Windows (Content Area)	3
0201	Room Height (Task Area)	
	Verify that rooms; living rooms, kitchens, bedrooms, bathrooms, water-closet	
	rooms, and hallways comply with minimum dimensions, area and ceiling height	
	requirements.	
0202	Doors (Task Area)	
	Verify conformance with code requirements for door location, size, type and	1
	installation	
0203	Windows and Skylights (Task Area)	2
	Verify that windows and skylights have required areas for light and openable	2
02	areas, that glazing is correctly installed, and has required glass thickness.	
03 0301	Means of Egress (Content Area) Stairs and Ramps (Task Area)	
0301	Verify that stairs and ramps have required tread, width, riser, landing, and	
	headroom dimensions.	
0302	Handrails and Guards (Task Area)	
0002	Verify that handrails and guards are provided and have the proper dimensions	
	and comply with code requirements	
0303	Exiting (Task Area)	
	Verify that egress doors have correct height, width and proper hardware; that	
	windows intended for use as emergency egress have correct clear opening	
	areas, clear width and sill height and that exits have proper access, signs,	
	lighting, and fire protection.	
04	Design of Areas and Spaces (Content Area)	4
0401	Fire Protection (Task Area)	
	Verify code compliance: fire separations located where required and have	
	correct fire-resistance rating and that fire protection of structural members, rating of openings and penetrations, fire stops, flame spread limits of building	
	materials, alarm & detection systems & fire fighting provisions	
0402	Sound Control (Task Area)	
0702	Verify code compliance for sound transmission ratings.	
0403	Crawl Spaces / Roof Spaces (Task Area)	
0-00	Verify crawl spaces have proper access, ventilation, clearance, drainage, ground	1
	cover and fire protection and roof spaces have proper access and ventilation.	-
0404	Electrical Facilities / Plumbing Facilities (Task Area)	1

	Marked and a land the family and the family and the family of the state of the stat	· · · · · · · · · · · · · · · · · · ·
	Verify that electrical installations are installed according to code provisions and	
	that lighting outlets are provided as required. Verify that required plumbing	
	facilities and a sewage disposal system are installed and that water supply,	
	distribution, and water heating are installed properly.	
0405	Garages and Carports (Task Area)	1
	Verify code compliance for the construction of garages and carports.	
0406	Spatial Separations (Task Area)	2
	Verify that the spatial separation between buildings meets code requirements	£
05	Excavations, Footings and Foundations (Content Area)	10
		10
0501	Excavation (Task Area)	0
	Verify excavations are of the proper depth and Inspect backfill against foundation	0
0500	and basement walls	
0502	Waterproofing and Dampproofing (Task Area)	0
	Verify that the moisture barrier beneath concrete slabs and for foundation and	0
0500	basement walls meets code requirements for waterproofing and dampproofing	
0503	Drainage (Task Area)	2
0501	Verify compliance with code provisions for subsurface and surface drainage	
0504	Footings and Foundations (Task Area)	
	Verify that concrete footings have proper depth, reinforcement (where required),	
	and that concrete has required compressive strength and air content. Verify that	6
	wood foundations, where permitted, are properly constructed and protected	Ŭ
	against termites and decay. Verify proper size, height above grade,	
	reinforcement size, type, and grade of foundations.	
0505	Slabs-On-Ground (Task Area)	
	Inspect concrete slabs, verifying proper sizing, placement, and support of welded	2
	wire fabric and reinforcing bar, and proper placement/location of	2
	control/construction joints	
06	Framing (Content Area)	12
0601	Columns (Task Area)	
	Verify that wood, steel, masonry, and solid concrete columns meet code	2
	requirements.	
0602	General Framing / Framing Members (Task Area)	
	Inspect foundations, sills, sleepers, trusses, joists and rafters and foundation	
	studs, verifying proper grade, size, bearing, support, span, spacing, blocking,	
	bracing or bridging, and fasteners. Inspect roof, wall and floor framing, verifying	7
	proper span, grade, and fasteners. Verify that steel stud wall framing complies	
	with code provisions for size, thickness, fastening and load bearing	
	characteristics.	
0603	Fastening / Drilling / Notching (Task Area)	
	Verify that anchor bolts and other structural fasteners are of proper size, spacing,	4
	and installation. Ensure the integrity of framing members and beams from any	1
	defects, cutting, drilling, or notching.	
0604	Beams and Lintels (Task Area)	
	Verify that beams, girders and lintels are of proper grade, size, bearing, support,	1
	span, spacing, blocking, and bracing or bridging	-
0605	Sheathing and Subflooring (Task Area)	
0000	Inspect roof, wall and floor sheathing, verifying proper thickness, grade and	1
	fastening methods	•
07	Masonry and Insulating Concrete Form Walls (Content Area)	5
0701	Above-Grade Masonry (Task Area)	2

Inspect masonry units, verifying required dimensions, minimum thickness, alignment of finished work, joint construction, mortar quality, bonding and tying, lateral support, chases and recesses, and installation of cleanouts where required. Inspect masonry reinforcement, verifying adequate size, grade, and clearances. 0702 Chimneys and Flues (Task Area) 2 0703 Chimneys and Flues (Task Area) 2 0704 Chimneys and Flues (Task Area) 1 0705 Insulating Concrete Form Walls (Task Area) 1 1nspect insulation, Ventilation and Heating (Content Area) 7 080 Thermal Insulation, Ventilation and Heating (Content Area) 7 0801 Insulation (Task Area) 3 0802 Ventilation of adequate heating facilities and fire protection requirements for natural and mechanical ventilation are met. 3 0803 Heating and Air Conditioning (Task Area) 5 0901 Roofing (Task Area) 5 0901 Roofing (Task Area) 5 0901 Roofing (Task Area) 3 0901 Roofing (Task Area) 5 0901 Roofing (Task Area) 3 0902 Stding and Cladding (Task Area) 3 0903 Protection from Precipit			
clearances. clearances. 0702 Chimneys and Flues (Task Area) Verify that chimneys and flues are of proper construction, that masonry and concrete chimney construction conform to code and that proper clearance from combustible construction is maintained. 2 0703 Insulating Concrete form Walls (Task Area) 1 Inspect insulating concrete form walls for conformance to code provisions. 1 088 Thermal Insulation, Ventilation and Heating (Content Area) 7 0801 Insulation (Task Area) 7 0802 Ventilation (Task Area) 3 0803 Heating and Air Conditioning (Task Area) 3 0803 Heating and Air Conditioning (Task Area) 5 0901 Roofing (Task Area) 5 0901 Roofing (Task Area) 5 0902 Siding and Cladding (Task Area) 5 0902 Siding and Cladding (Task Area) 2 0902 Siding and Cladding (Task Area) 5 0903 Protection from Precipitation (Rashing, verifying proper application and attachment appropriate to the type of siding and flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the mosture index. 3		alignment of finished work, joint construction, mortar quality, bonding and tying, lateral support, chases and recesses, and installation of cleanouts where	
0702 Chimneys and Flues (Task Area) 2 Verify that chimneys and flues are of proper construction, that masonry and concrete chimney construction conform to code and that proper clearance from combustible construction is maintained. 1 0703 Insulating Concrete Form Walls (Task Area) 1 0801 Insulation, Ventilation and Heating (Content Area) 7 0801 Insulation (Task Area) 7 0802 Verify that requirements for natural and mechanical ventilation are met. 3 0803 Heating and Air Conditioning (Task Area) 3 0904 Exterior Finish (Content Area) 5 0905 Exterior Finish (Content Area) 5 0906 Inspect insulation of adequate heating facilities and fire protection requirements for heating appliances. 5 0901 Roofing (Task Area) 5 0902 Siding and Cladding (Task Area) 5 0903 Protection, roof underlay, proper application of cedar and shake shingles, and built-up roofs. 3 0903 Siding and Cladding (Task Area) Verify that proper stuce materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements. 3 0903 Protection from Precipitation (Rain) (Task Area)			
concrete chimney construction conform to code and that proper clearance from combustible construction is maintained.20703Insulating Concrete Form Walls (Task Area) Inspect insulating concrete form walls for conformance to code provisions.108Thermal Insulation, Ventilation and Heating (Content Area)70801Insulation (Task Area) Inspect wall, ceiling, and floor insulation, verifying correct flame-spread rating, and correct placement of vapour barrier.30802Ventilation (Task Area) Verify that requirements for natural and mechanical ventilation are met.30803Heating and Air Conditioning (Task Area) Verify installation of adequate heating facilities and fire protection requirements for heating appliances.509Exterior Finish (Content Area)50901Roofing (Task Area) Verify the proper use of roofing materials appropriate to the type of roof, flashing, eave protection, roof underlay, proper application of cedar and shake shingles, and built-up roofs.20902Siding and Cladding (Task Area) Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements.00903Protection from Precipitation (Rain) (Task Area) Verify that the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.010Interior Finish (Content Area)011Interior Finish	0702		
0703 Insulating Concrete Form Walls (Task Area) Inspect insulating concrete form walls for conformance to code provisions. 1 08 Thermal Insulation, Ventilation and Heating (Content Area) 7 0801 Insulation (Task Area) Inspect wall, ceiling, and floor insulation, verifying correct flame-spread rating, and correct placement of vapour barrier. 3 0802 Ventilation (Task Area) Verify that requirements for natural and mechanical ventilation are met. 3 0803 Heating and Air Conditioning (Task Area) Verify installation of adequate heating facilities and fire protection requirements for heating appliances. 1 09 Exterior Finish (Content Area) Verify the proper use of roofing materials appropriate to the type of roof, flashing, eave protection, roof underlay, proper application of cedar and shake shingles, and built-up roofs. 2 0902 Siding and Cladding (Task Area) Verify that proper suce of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements. 3 0903 Protection from Precipitation (Rain) (Task Area) Verify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index. 0 10 Interior Finish (Content Area) 0 101 Warify that the exterior p		concrete chimney construction conform to code and that proper clearance from	2
Inspect insulating concrete form walls for conformance to code provisions. 7 08 Thermal Insulation, Ventilation and Heating (Content Area) 7 0801 Insulation (Task Area) 3 Inspect wall, ceiling, and floor insulation, verifying correct flame-spread rating, and correct placement of vapour barrier. 3 0802 Ventilation (Task Area) 3 0803 Heating and Air Conditioning (Task Area) 3 Verify that requirements for natural and mechanical ventilation are met. 3 0803 Heating and Air Conditioning (Task Area) 4 Verify installation of adequate heating facilities and fire protection requirements for heating appliances. 5 090 Exterior Finish (Content Area) 5 0901 Roofing (Task Area) 5 0902 Siding and Cladding (Task Area) 2 0902 Siding and Cladding (Task Area) 3 0902 Siding and Cladding (Task Area) 3 0903 Protection from Precipitation meets code requirements. 3 0903 Protection from Precipitation (Rain) (Task Area) 0 0903 Protection from Precipitation Reain) (ru	0703	Insulating Concrete Form Walls (Task Area)	1
0801 Insulation (Task Area) Inspect wall, ceiling, and floor insulation, verifying correct flame-spread rating, and correct placement of vapour barrier. 3 0802 Ventilation (Task Area) 3 0803 Verify that requirements for natural and mechanical ventilation are met. 3 0803 Heating and Air Conditioning (Task Area) 1 0803 Heating and Air Conditioning (Task Area) 5 090 Exterior Finish (Content Area) 5 0901 Roofing (Task Area) 5 0902 Siding and Cladding (Task Area) 2 verify the proper use of roofing materials appropriate to the type of roof, flashing, eave protection, roof underlay, proper application of cedar and shake shingles, and built-up roofs. 2 0902 Siding and Cladding (Task Area) 2 10902 Siding and Cladding (Task Area) 3 10903 Protection from Precipitation (Rain) (Task Area) 3 10904 Verify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including capillary break, first and second plane of protection are provided, including checking the provision for the moisture index. 0 1001 Interior Finish (Content Area) 1			
Inspect wall, ceiling, and floor insulation, verifying correct flame-spread rating, and correct placement of vapour barrier.30802Ventilation (Task Area) Verify that requirements for natural and mechanical ventilation are met.30803Heating and Air Conditioning (Task Area) Verify installation of adequate heating facilities and fire protection requirements for heating appliances.109Exterior Finish (Content Area)50901Roofing (Task Area) Verify the proper use of roofing materials appropriate to the type of roof, flashing, eave protection, roof underlay, proper application of cedar and shake shingles, and built-up roofs.20902Siding and Cladding (Task Area) Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements.30903Protection from Precipitation (Rain) (Task Area) Verify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.010Interior Finish (Content Area) Nepect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying correct type and thickness, and correct size, type, and location of fasteners.3			7
Verify that requirements for natural and mechanical ventilation are met.30803Heating and Air Conditioning (Task Area) Verify installation of adequate heating facilities and fire protection requirements for heating appliances.109Exterior Finish (Content Area)50901Roofing (Task Area) Verify the proper use of roofing materials appropriate to the type of roof, flashing, eave protection, roof underlay, proper application of cedar and shake shingles, and built-up roofs.20902Siding and Cladding (Task Area) Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements.30903Protection from Precipitation (Rain) (Task Area) Verify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.010Interior Finish (Content Area) Nall and Ceiling (Task Area) Nerify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.010Interior Finish (Content Area) Napect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying correct type and thickness, and correct size, type, and location of fasteners.3		Inspect wall, ceiling, and floor insulation, verifying correct flame-spread rating, and correct placement of vapour barrier.	3
Verify installation of adequate heating facilities and fire protection requirements for heating appliances.109Exterior Finish (Content Area)50901Roofing (Task Area) Verify the proper use of roofing materials appropriate to the type of roof, flashing, eave protection, roof underlay, proper application of cedar and shake shingles, and built-up roofs.20902Siding and Cladding (Task Area) Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements.30903Protection from Precipitation (Rain) (Task Area) Verify that the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.010Interior Finish (Content Area) Inspect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying correct type and thickness, and correct size, type, and location of fasteners.1		Verify that requirements for natural and mechanical ventilation are met.	3
0901Roofing (Task Area) Verify the proper use of roofing materials appropriate to the type of roof, flashing, eave protection, roof underlay, proper application of cedar and shake shingles, and built-up roofs.20902Siding and Cladding (Task Area) Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements.30903Protection from Precipitation (Rain) (Task Area) Verify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.010Interior Finish (Content Area) Inspect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying correct type and thickness, and correct size, type, and location of fasteners.0	0803	Verify installation of adequate heating facilities and fire protection requirements	1
Verify the proper use of roofing materials appropriate to the type of roof, flashing, eave protection, roof underlay, proper application of cedar and shake shingles, and built-up roofs.20902Siding and Cladding (Task Area) Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements.30903Protection from Precipitation (Rain) (Task Area) Verify that the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.010Interior Finish (Content Area) Inspect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying correct type and thickness, and correct size, type, and location of fasteners.0	09	Exterior Finish (Content Area)	5
Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements.30903Protection from Precipitation (Rain) (Task Area) Verify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.010Interior Finish (Content Area) Inspect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying correct type and thickness, and correct size, type, and location of fasteners.0	0901	Verify the proper use of roofing materials appropriate to the type of roof, flashing, eave protection, roof underlay, proper application of cedar and shake shingles,	2
0903Protection from Precipitation (Rain) (Task Area) Verify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.010Interior Finish (Content Area)01001Wall and Ceiling (Task Area) Inspect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying correct type and thickness, and correct size, type, and location of fasteners.0			
1001 Wall and Ceiling (Task Area) Inspect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying correct type and thickness, and correct size, type, and location of fasteners.	0902	Siding and Cladding (Task Area) Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly	
Inspect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying correct type and thickness, and correct size, type, and location of fasteners.	0903	Siding and Cladding (Task Area) Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements. Protection from Precipitation (Rain) (Task Area) Verify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.	3
	0903	Siding and Cladding (Task Area) Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements. Protection from Precipitation (Rain) (Task Area) Verify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.	3
	0903 10	Siding and Cladding (Task Area) Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements. Protection from Precipitation (Rain) (Task Area) Verify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index. Interior Finish (Content Area) Wall and Ceiling (Task Area) Inspect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying	3

Questions for tasks that are shaded appear on Level 1, Exam 1 - Building Envelope.

	Level I, Exam 2 - HEALTH AND SAFETY EXAM	# of
	Two & half hour limit, 50 multiple choice questions, open book.	Questions
01	General Administrative Requirements (Content Area)	6
0101	Application (Task Area) Answer general administration questions about the application and interpretation of the code, inspections, plans, specifications, professional design and review.	3
0102	Materials (Task Area) Identify the suitability and use of materials according to the listing and labeling and approved installation methods.	1
0103	Structural Requirements (Task Area) Verify code compliance of structural requirements including snow loads, deflections, and foundation conditions.	2
02	Rooms, Spaces, Doors and Windows (Content Area)	5
0201	Room Height (Task Area) Verify that rooms; living rooms, kitchens, bedrooms, bathrooms, water-closet rooms, and hallways comply with minimum dimensions, area and ceiling height requirements.	3
0202	Doors (Task Area) Verify conformance with code requirements for door location, size, type and installation	2
0203	Windows and Skylights (Task Area) Verify that windows and skylights have required areas for light and openable areas, that glazing is correctly installed, and has required glass thickness.	
03	Means of Egress (Content Area)	10
0301	Stairs and Ramps (Task Area) Verify that stairs and ramps have required tread, width, riser, landing, and headroom dimensions.	5
0302	Handrails and Guards (Task Area) Verify that handrails and guards are provided and have the proper dimensions and comply with code requirements.	3
0303	Exiting (Task Area) Verify that egress doors have correct height, width and proper hardware; that windows intended for use as emergency egress have correct clear opening areas, clear width and sill height and that exits have proper access, signs, lighting, and fire protection.	2
04	Design of Areas and Spaces (Content Area)	14
0401	Fire Protection (Task Area) Verify code compliance: fire separations located where required and have correct fire-resistance rating and that fire protection of structural members, rating of openings and penetrations, fire stops, flame spread limits of building materials, alarm & detection systems & firefighting provisions	6
0402	Sound Control (Task Area) Verify code compliance for sound transmission ratings	
0403	Crawl Spaces / Roof Spaces (Task Area) Verify crawl spaces have proper access, ventilation, clearance, drainage, ground cover and fire protection and roof spaces have proper access and ventilation.	2

0404	Electrical Facilities / Plumbing Facilities (Task Area) Verify that electrical installations are installed according to code provisions and that lighting outlets are provided as required. Verify that required plumbing facilities and a sewage disposal system are installed and that water supply, distribution, and water heating are installed properly.	3
0405	Garages and Carports (Task Area) Verify code compliance for the construction of garages and carports.	1
0406	Spatial Separations (Task Area) Verify that the spatial separation between buildings meets code requirements	2
05	Excavations, Footings and Foundations (Content Area)	
0501	Excavation (Task Area) Verify that excavations are of the proper depth and Inspect backfill against foundation and basement walls	
0502	Waterproofing and Dampproofing (Task Area) Verify that the moisture barrier beneath concrete slabs and for foundation and basement walls meets code requirements for waterproofing and dampproofing	
0503	Drainage (Task Area) Verify code compliance for subsurface and surface drainage	
0504	Footings and Foundations (Task Area) Verify that concrete footings have proper depth, reinforcement (where required), and that concrete has required compressive strength and air content. Verify that wood foundations, where permitted, are properly constructed, and protected against termites and decay. Verify proper size, height above grade, reinforcement size, type, and grade of foundations.	
0505	Slabs-On-Ground (Task Area) Inspect concrete slabs, verifying proper sizing, placement, and support of welded wire fabric and reinforcing bar, and proper placement/location of control/construction joints	
06	Framing (Content Area)	
0601	Columns (Task Area) Verify that wood, steel, masonry, and solid concrete columns meet code requirements	
0602	General Framing / Framing Members (Task Area) Inspect foundations, sills, sleepers, trusses, joists and rafters and foundation studs, verifying proper grade, size, bearing, support, span, spacing, blocking, bracing or bridging, and fasteners. Inspect roof, wall and floor framing, verifying proper span, grade, and fasteners. Verify that steel stud wall framing complies with code provisions for size, thickness, fastening and load bearing characteristics.	
0603	Fastening / Drilling / Notching (Task Area) Verify that anchor bolts and other structural fasteners are of proper size, spacing, and installation. Ensure the integrity of framing members and beams from any defects, cutting, drilling, or notching	
0604	Beams and Lintels (Task Area) Verify that beams, girders, and lintels are of proper grade, size, bearing, support, span, spacing, blocking, and bracing or bridging.	
0605	Sheathing and Subflooring (Task Area) Inspect roof, wall and floor sheathing, verifying proper thickness, grade and fastening methods	

07	Masonry and Insulating Concrete Form Walls (Content Area)	1
0701	Above-Grade Masonry (Task Area) Inspect masonry units, verifying required dimensions, minimum thickness, alignment of finished work, joint construction, mortar quality, bonding and tying, lateral support, chases and recesses, and installation of cleanouts where required. Inspect masonry reinforcement, verifying adequate size, grade, and clearances	
0702	Chimneys and Flues (Task Area) Verify that chimneys and flues are of proper construction, that masonry and concrete chimney construction conform to code and that proper clearance from combustible construction is maintained.	
0704	Insulating Concrete Form Walls (Task Area) Inspect insulating concrete form walls for conformance to code provisions.	1
08	Thermal Insulation, Ventilation and Heating (Content Area)	9
0801	Insulation (Task Area) Inspect wall, ceiling, and floor insulation, verifying correct flame-spread rating, and correct placement of vapour barrier	3
0802	Ventilation (Task Area) Verify that requirements for natural and mechanical ventilation are met.	4
0803	Heating (Task Area) Verify the installation of adequate heating facilities and fire protection requirements for heating appliances.	2
09	Exterior Finish (Content Area)	
0901	Roofing (Task Area) Verify the proper use of roofing materials appropriate to the type of roof, flashing, eave protection, roof underlay, proper application of cedar and shake shingles, and built-up roofs.	
0902	Siding and Cladding (Task Area) Inspect exterior wall and roof siding, verifying proper application and attachment appropriate for the type of siding and flashing. Verify that proper stucco materials and lath and reinforcing materials are used, that lath and reinforcing are properly fastened and that the stucco application meets code requirements.	
0903	Protection from Precipitation (Rain) (Task Area) Verify that the exterior assembly, including flashing, the exterior cladding, capillary break, first and second plane of protection are provided, including checking the provision for the moisture index.	
10	Interior Finish (Content Area)	4
1001	Interior Walls, Ceilings, and Floors (Task Area) Inspect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying correct type and thickness, and correct size, type, and location of fasteners.	5
		50

ACBOA Level II - EXAM 3 - HVAC AND FIRE PROTECTION EXAM CONTENT OUTLINE

Questions for tasks that are shaded appear on Level II, Exam 4 - Structural.

	Level II, Exam 3 – HVAC AND FIRE PROTECTION Two & half hour limit, 50 multiple choice questions, open book.	# of Question s
01	General Administrative Requirements	2
0101	Application Answer general administration questions about the application and interpretation of the code, inspections, plans, specifications, professional design and review.	1
0102	Materials Identify suitability and use of materials according to the listing and labeling and approved installation methods.	1
0103	Structural Requirements Verify conformance with code structural requirements including snow loads, deflections, and foundation conditions.	
02	Rooms, Doors and Windows	4
0201	Room Height Verify that rooms, including living rooms, kitchens, bedrooms, bathrooms, water-closet rooms, and hallways comply with minimum dimensions, area and ceiling height requirements.	1
0202	Exterior Doors Verify conformance with code requirements for door location, size, type and installation	2
0203	Windows and Skylights Verify that windows and skylights have required areas for light and openable areas, that glazing is correctly installed, and has required glass thickness.	1
03	Means of Egress	14
0301	Stairs and Ramps Verify that stairs and ramps have required tread, width, riser, landing and headroom dimensions.	4
0302	Handrails and Guards Verify that handrails & guards are provided & have proper dimensions and are installed as required by code.	3
0303	Exiting Verify that egress doors have correct height, width and proper hardware; that windows intended for use as emergency egress have correct clear opening areas, clear width and sill height and that exits have proper access, signs, lighting, and fire protection.	7
04F	Fire Protection	23
0401F	Occupancy Classification Verify occupancy classification, occupant loads and compliance with code requirements.	3
0402F	Fire-Resistance Rating Verify that fire separations between occupancies have correct fire-resistance rating.	4
0403F	Fire Protection / Fire Separation Verify fire protection of openings, penetrations, fire stops, and flame spread limits of materials.	6

	Varify that fine wells mean too do no winers and a	
0.4075	Verify that fire walls meet code requirements.	
0405F	Fire Protection of Means of Egress	4
	Verify fire protection of Means of egress.	
0406F	Interconnected Floor Areas	1
	Verify fire protection of interconnected floor areas.	•
0407F	Building Size Determination / Mezzanines	1
	Verify that building size and mezzanines comply with code provisions.	•
0408F	Spatial Separations	1
	Verify that the spatial separation for buildings meets code requirements.	•
0409F	Alarm Systems	
	Verify that alarm and detection systems comply with code; Verify provisions for	2
	fire fighting	
05	Excavations, Footings, Foundations and Grading	1
0501	Excavation	
	Verify that excavations are of the proper depth and Inspect backfill against	
	foundation and basement walls	
0502	Waterproofing and Dampproofing	
	Verify that the moisture barrier beneath concrete slabs and for foundation and	
	basement walls meets code requirements for waterproofing and dampproofing	
0503	Drainage	
	Verify compliance with code provisions for subsurface and surface drainage.	
0504	Footings and Foundations	
	Verify that concrete footings have proper depth, reinforcement (where required),	
	and that concrete has required compressive strength and air content. Verify	
	that wood foundations, where permitted, are properly constructed, and	
	protected against termites and decay. Verify proper size, height above grade,	
	reinforcement size, type, and grade of foundations.	
0505	Slabs-On-Ground	
	Inspect concrete slabs, verifying proper sizing, placement, and support of	4
	welded wire fabric and reinforcing bar, and proper placement/location of	1
	control/construction joints	
06	Framing	
0601	Columns	
	Verify that wood, steel, masonry, and solid concrete columns meet code	
	requirements.	
0602	General Framing / Framing Members	
	Inspect and verify foundations, sills, sleepers, trusses, joists and rafters and	
	foundation studs, verifying proper grade, size, bearing, support, span, spacing,	
	blocking, bracing, or bridging, and fasteners. Inspect roof, wall and floor	
	framing, verifying proper span, grade, and fasteners. Verify that steel stud wall	
	framing complies with code provisions for size, thickness, fastening and load	
	bearing characteristics.	
0603	Fastening / Drilling / Notching	
0000	Verify that anchor bolts and other structural fasteners are of proper size,	
	spacing, and installation. Ensure the integrity of framing members and beams	
	from any defects, cutting, drilling, or notching.	
0604		
0604	Beams and Lintels	
	Verify that beams, girders and lintels are of proper grade, size, bearing, support,	
0007	span, spacing, blocking, and bracing or bridging.	
0605	Sheathing and Subflooring	
	Inspect roof, wall and floor sheathing, verifying proper thickness, grade and	
	fastening methods	

07	Masonry and Insulating Concrete Form Walls	
0701	Above-Grade Masonry Inspect masonry units, verifying required dimensions, minimum thickness, alignment of finished work, joint construction, mortar quality, bonding and tying, lateral support, chases and recesses, and installation of cleanouts where required. Inspect masonry reinforcement, verifying adequate size, grade, and clearances.	
0702	Chimneys and Flues Verify that chimneys and flues are of proper construction, that masonry and concrete chimney construction conform to code and that proper clearance from combustible construction is maintained.	
0703	Insulating Concrete Form Walls Inspect insulating concrete form walls for conformance to code provisions.	
08	Health, Safety and Comfort	6
0801	Insulation Inspect wall, ceiling, and floor insulation, verifying correct flame-spread rating, and correct placement of vapour barrier.	1
0802	Ventilation Verify that requirements for natural and mechanical ventilation are met.	1
0803	Heating and Air Conditioning Verify the installation of adequate heating facilities and fire protection requirements for gas and electric ranges.	
0804	Heat Transfer, Air Leakage, Condensation Control Verify that wall, ceiling, and floor insulation, and correct placement of air and vapour barriers meet code requirements.	1
0805	Sound Control Verify compliance with code provisions for sound transmission ratings.	1
0806	Crawl Spaces / Roof Spaces Verify that crawl spaces have proper access, ventilation, clearance, drainage, ground cover and fire protection. Verify that roof spaces have proper access and ventilation and fire protection.	2
09	Exterior Finish	
0901	Roofing Verify the proper use of roofing materials appropriate to the type of roof, flashing, eave protection, roof underlay, proper application of cedar and shake shingles, and built-up roofs.	
0902	Cladding Inspect exterior wall and roof covering, verifying proper application and attachment appropriate for the type of cladding and flashing.	
10	Interior Finish	
1001	Interior Walls, Ceilings, and Floors Inspect interior plastering, sheathing, wallboard, plywood and hardwood finish, fibreboard finish, particleboard and waferboard finish, and wall tile, verifying correct type and thickness, and correct size, type, and location of fasteners.	
		50

ACBOA Level II - EXAM 4 - STRUCTURAL EXAM CONTENT OUTLINE

Questions for tasks that are shaded appear on Level II, Exam 3 - HVAC & Fire Protection.

	Level II, Exam 4 – STRUCTURAL Two & half hour limit, 50 multiple choice questions, open book.	# of Question s
01	General Administrative Requirements	3
0101	Application Answer general administration questions about the application and interpretation of the code, inspections, plans, specifications, professional design and review.	1
0102	Materials Identify suitability and use of materials according to the listing and labeling and approved installation methods.	1
0103	Structural Requirements Verify conformance with code structural requirements including snow loads, deflections, and foundation conditions.	1
02	Rooms, Doors and Windows	
0201	Room Height Verify that rooms, including living rooms, kitchens, bedrooms, bathrooms, water- closet rooms, and hallways comply with minimum dimensions, area and ceiling height requirements.	
0202	Exterior Doors Verify conformance with code requirements for door location, size, type and installation	
0203	Windows and Skylights Verify that windows and skylights have required areas for light and openable areas, that glazing is correctly installed, and has required glass thickness.	
03	Means of Egress	
0301	Stairs and Ramps Verify that stairs and ramps have required tread, width, riser, landing and headroom dimensions.	
0302	Handrails and Guards Verify that handrails & guards are provided & have proper dimensions and are installed as required by code.	
0303	Exiting Verify that egress doors have correct height, width and proper hardware; that windows intended for use as emergency egress have correct clear opening areas, clear width and sill height and that exits have proper access, signs, lighting, and fire protection.	
04F	Fire Protection	
0401F	Occupancy Classification Verify occupancy classification, occupant loads and compliance with code requirements.	
0402F	Fire-Resistance Rating Verify that fire separations between occupancies have correct fire-resistance rating.	
0403F	Fire Protection / Fire Separation Verify fire protection of openings, penetrations, fire stops, and flame spread limits of materials.	
0404F	Fire Walls Verify that fire walls meet code requirements.	

0405F	Fire Protection of Means of Egress	
	Verify fire protection of Means of egress.	
0406F	Interconnected Floor Areas	
01001	Verify fire protection of interconnected floor areas.	
0407F	Building Size Determination / Mezzanines	
	Verify that building size and mezzanines comply with code provisions.	
0408F	Spatial Separations	
	Verify that the spatial separation for buildings meets code requirements.	
0409F	Alarm Systems	
	Verify that alarm and detection systems comply with code; Verify provisions for	
	fire fighting	
05	Excavations, Footings, Foundations and Grading	17
0501	Excavation	
	Verify that excavations are of the proper depth and Inspect backfill against	2
	foundation and basement walls	
0502	Waterproofing and Dampproofing	
	Verify that the moisture barrier beneath concrete slabs and for foundation and	3
	basement walls meets code requirements for waterproofing and dampproofing	
0503	Drainage	1
	Verify compliance with code provisions for subsurface and surface drainage.	•
0504	Footings and Foundations	
	Verify that concrete footings have proper depth, reinforcement (where required),	
	and that concrete has required compressive strength and air content. Verify that	9
	wood foundations, where permitted, are properly constructed and protected	Ũ
	against termites and decay. Verify proper size, height above grade,	
	reinforcement size, type, and grade of foundations.	
0505	Slabs-On-Ground	
	Inspect concrete slabs, verifying proper sizing, placement, and support of welded	2
	wire fabric and reinforcing bar, and proper placement/location of	
00	control/construction joints	
06	Framing	20
0601	Columns	2
	Verify that wood, steel, masonry, and solid concrete columns meet code	3
0602	requirements. General Framing / Framing Members	
0002	Inspect and verify foundations, sills, sleepers, trusses, joists and rafters and	
	foundation studs, verifying proper grade, size, bearing, support, span, spacing,	
	blocking, bracing or bridging, and fasteners. Inspect roof, wall and floor	8
		0
	traming varitying proper span grade and tasteners. Varity that steel stud wall	
	framing, verifying proper span, grade, and fasteners. Verify that steel stud wall framing complies with code provisions for size, thickness, fastening and load	
	framing complies with code provisions for size, thickness, fastening and load	
0603	framing complies with code provisions for size, thickness, fastening and load bearing characteristics.	
0603	framing complies with code provisions for size, thickness, fastening and load bearing characteristics. Fastening / Drilling / Notching	
0603	framing complies with code provisions for size, thickness, fastening and load bearing characteristics. Fastening / Drilling / Notching Verify that anchor bolts and other structural fasteners are of proper size,	2
0603	framing complies with code provisions for size, thickness, fastening and load bearing characteristics. Fastening / Drilling / Notching Verify that anchor bolts and other structural fasteners are of proper size, spacing, and installation. Ensure the integrity of framing members and beams	2
	framing complies with code provisions for size, thickness, fastening and load bearing characteristics. Fastening / Drilling / Notching Verify that anchor bolts and other structural fasteners are of proper size,	2
0603	framing complies with code provisions for size, thickness, fastening and load bearing characteristics. Fastening / Drilling / Notching Verify that anchor bolts and other structural fasteners are of proper size, spacing, and installation. Ensure the integrity of framing members and beams from any defects, cutting, drilling, or notching. Beams and Lintels	2
	framing complies with code provisions for size, thickness, fastening and load bearing characteristics. Fastening / Drilling / Notching Verify that anchor bolts and other structural fasteners are of proper size, spacing, and installation. Ensure the integrity of framing members and beams from any defects, cutting, drilling, or notching. Beams and Lintels Verify that beams, girders and lintels are of proper grade, size, bearing, support,	
0604	framing complies with code provisions for size, thickness, fastening and load bearing characteristics. Fastening / Drilling / Notching Verify that anchor bolts and other structural fasteners are of proper size, spacing, and installation. Ensure the integrity of framing members and beams from any defects, cutting, drilling, or notching. Beams and Lintels Verify that beams, girders and lintels are of proper grade, size, bearing, support, span, spacing, blocking, and bracing or bridging.	
	framing complies with code provisions for size, thickness, fastening and load bearing characteristics. Fastening / Drilling / Notching Verify that anchor bolts and other structural fasteners are of proper size, spacing, and installation. Ensure the integrity of framing members and beams from any defects, cutting, drilling, or notching. Beams and Lintels Verify that beams, girders and lintels are of proper grade, size, bearing, support, span, spacing, blocking, and bracing or bridging. Sheathing and Subflooring	4
0604	framing complies with code provisions for size, thickness, fastening and load bearing characteristics. Fastening / Drilling / Notching Verify that anchor bolts and other structural fasteners are of proper size, spacing, and installation. Ensure the integrity of framing members and beams from any defects, cutting, drilling, or notching. Beams and Lintels Verify that beams, girders and lintels are of proper grade, size, bearing, support, span, spacing, blocking, and bracing or bridging.	

07	Masonry and Insulating Concrete Form Walls	4
0701	Above-Grade Masonry	
	Inspect masonry units, verifying required dimensions, minimum thickness,	
	alignment of finished work, joint construction, mortar quality, bonding and tying,	
	lateral support, chases and recesses, and installation of cleanouts where	1
	required. Inspect masonry reinforcement, verifying adequate size, grade, and	
	clearances.	
0702	Chimneys and Flues	
	Verify that chimneys and flues are of proper construction, that masonry and	1
	concrete chimney construction conform to code and that proper clearance from	1
	combustible construction is maintained.	
0703	Insulating Concrete Form Walls	0
	Inspect insulating concrete form walls for conformance to code provisions.	2
08	Health, Safety and Comfort	
0801	Insulation	
	Inspect wall, ceiling, and floor insulation, verifying correct flame-spread rating,	
	and correct placement of vapour barrier.	
0802	Ventilation	
	Verify that requirements for natural and mechanical ventilation are met.	
0803	Heating and Air Conditioning	
	Verify the installation of adequate heating facilities and fire protection	
	requirements for gas and electric ranges.	
0804	Heat Transfer, Air Leakage, Condensation Control	
	Verify that wall, ceiling, and floor insulation, and correct placement of air and	
	vapour barriers meet code requirements.	
0805	Sound Control	
	Verify compliance with code provisions for sound transmission ratings.	
0806	Crawl Spaces / Roof Spaces	
	Verify that crawl spaces have proper access, ventilation, clearance, drainage,	
	ground cover and fire protection. Verify that roof spaces have proper access	
	and ventilation and fire protection.	
09	Exterior Finish	4
0901	Roofing	
	Verify the proper use of roofing materials appropriate to the type of roof, flashing,	2
	eave protection, roof underlay, proper application of cedar and shake shingles,	
	and built-up roofs.	
0902	Cladding	
	Inspect exterior wall and roof covering, verifying proper application and	2
40	attachment appropriate for the type of cladding and flashing.	•
10	Interior Finish	2
1001	Interior Walls, Ceilings, and Floors	
	Inspect interior plastering, sheathing, wallboard, plywood and hardwood finish,	2
	fibreboard finish, particleboard and waferboard finish, and wall tile, verifying	
	correct type and thickness, and correct size, type, and location of fasteners.	50
		50

	Level II, Exam 5 – PLAN REVIEW Two & half hour limit, 50 multiple choice questions, open book.	# of Questions
01	General Administrative Requirements	1
0101	Application Answer general administration questions about the application and interpretation of the code, inspections, plans, specifications, professional design and review.	1
02	Rooms, Doors and Windows	3
0201	Room Height Verify that rooms, including living rooms, kitchens, bedrooms, bathrooms, water-closet rooms, and hallways comply with minimum dimensions, area and ceiling height requirements.	1
0202	Exterior Doors Verify conformance with code requirements for door location, size, type and installation	1
0203	Windows and Skylights Verify that windows and skylights have required areas for light and openable areas, that glazing is correctly installed, and has required glass thickness.	1
03	Means of Egress	11
0301	Stairs and Ramps Verify that stairs and ramps have required tread, width, riser, landing and headroom dimensions.	2
0302	Handrails and Guards Verify that handrails & guards are provided & have proper dimensions and are installed as required by code.	1
0303	Exiting Verify that egress doors have correct height, width and proper hardware; that windows intended for use as emergency egress have correct clear opening areas, clear width and sill height and that exits have proper access, signs, lighting, and fire protection.	8
04F	Fire Protection	10
0402F	Fire-Resistance Rating Verify that fire separations between occupancies have correct fire-resistance rating.	2
0403F	Fire Protection / Fire Separation Verify fire protection of openings, penetrations, fire stops, and flame spread limits of materials.	3
0404F	Fire Walls Verify that fire walls meet code requirements.	1
0405F	Fire Protection of Means of Egress Verify fire protection of Means of egress.	1
0407F	Building Size Determination / Mezzanines Verify that building size and mezzanines comply with code provisions.	1
0408F	Spatial Separations Verify that the spatial separation for buildings meets code requirements.	1
0409F	Alarm Systems Verify that alarm and detection systems comply with code; Verify provisions for fire fighting	1
05	Excavations, Footings, Foundations and Grading	4

0504		
0504	Footings and Foundations Verify that concrete footings have proper depth, reinforcement (where required), and that concrete has required compressive strength and air content. Verify that wood foundations, where permitted, are properly constructed and protected against termites and decay. Verify proper size, height above grade, reinforcement size, type, and grade of foundations.	3
0505	Slabs-On-Ground Inspect concrete slabs, verifying proper sizing, placement, and support of welded wire fabric and reinforcing bar, and proper placement/location of control/construction joints	1
06	Framing	8
0601	Columns Verify that wood, steel, masonry, and solid concrete columns meet code requirements.	1
0602	General Framing / Framing Members Inspect and verify foundations, sills, sleepers, trusses, joists and rafters, foundation studs, verifying proper grade, size, bearing, support, span, spacing, blocking, bracing or bridging, and fasteners. Inspect roof, wall and floor framing, verifying proper span, grade, and fasteners. Verify that steel stud wall framing complies with code provisions for size, thickness, fastening and load bearing characteristics.	5
0604	Beams and Lintels Verify that beams, girders and lintels are of proper grade, size, bearing, support, span, spacing, blocking, and bracing or bridging.	1
0605	Sheathing and Subflooring Inspect roof, wall and floor sheathing, verifying proper thickness, grade and fastening methods	1
07	Masonry and Insulating Concrete Form Walls	1
0701	Insulating Concrete Form Walls Inspect insulating concrete form assemblies, verifying required dimensions, reinforcement, thicknesses, spacing from corners, reinforcement of openings.	1
08	Health, Safety and Comfort	3
0801	Insulation Inspect wall, ceiling, and floor insulation, verifying correct flame-spread rating, and correct placement of vapour barrier.	1
0802	Ventilation Verify that requirements for natural and mechanical ventilation are met.	1
0805	Sound Control Verify compliance with code provisions for sound transmission ratings.	1
09	Exterior Finish	3
0902	Cladding Inspect exterior wall and roof covering, verifying proper application and attachment appropriate for the type of cladding and flashing.	3
10	Energy Efficiency	6
1001	Energy Efficiency Identify climactic zones and applicable requirements for insulation, verify that windows meet requirements for applicable regions, appliances and controls meet minimum efficiency standards,	6

ACBOA Level III - EXAM 6 - LARGE BUILDING HEALTH and SAFETY

	LEVEL III, Exam 6 - LARGE BUILDING HEALTH and SAFETY	
	Two & half hour limit, 40 multiple choice questions, open book.	
	Content Area	Questions
01	Health Requirements	10
	Room Height, Windows, Safety Glass, Plumbing Facilities, Lighting, Food	
	Premises.	
0	Accessible Design Washrooms	3
	Water Closet Rooms, Water Closet Compartments, Bath & Shower, Grab Bars	
03	Accessible Buildings	7
	Specific Requirements, Applications, and Exemptions, and Requirements for	
	Different Occupancies	
04	Environmental Separation	8
	Environmental Separation Requirements including Heat Transfer, Air Leakage,	
	and Vapour Diffusion, Moisture in the Ground and Surface Water, and Sound	
	Transmission Ratings & Classification	
05	HVAC	10
	Design and Installation of HVAC equipment and Chimneys and Venting	
	Equipment	
06	Service Spaces / Facilities	2
	Service Rooms, Vertical Service Spaces Horizontal Service Space	
	Total	40

ACBOA Level III - EXAM 7 - LARGE BUILDING CLASSIFICATION AND CONSTRUCTION

LEVEL III, Exam 7 - LARGE BUILDING CLASSIFICATION AND CONSTRUCTIO Two & half hour limit, 50 multiple choice questions, open book.		
	Content Area	Questions
1.	General Requirements	9
	Code Application, Definitions, Plans, Specification, Materials, Documents,	
	Professional Design and Review, Design Requirements	
2.	Classification and Construction Requirements	17
	Major Occupancy Identification, Occupant Load, Types of Construction,	
	Building Height, Size, Major Occupancy Separation, Spatial Separation,	
	Exceptions to Structural Fire Protection	
3.	Passive Fire Protection	15
	Fire Separations and Closures_Fire Stops, Flame Spread Rating, Smoke	
	Development, Firewalls, Fire Resistance Ratings	
4.	Structural Design	9
	Structural Loads, Limit State Design, Dead Loads and Live Loads, Foundations,	
	Requirements for Structural Materials and Special Structures	
	Total	50

	LEVEL III, Exam 8 – PLAN REVIEW Two & half hour limit, 50 multiple choice guestions, open book.	
	Content Area	Questions
1.	Administrative Requirements Application of Administrative Requirements	2
2.	General Requirements Major Occupancy Identification and Separation, Occupant Load, Types of Construction, Fire Separations and Closures, Fire Stops, Flame Spread Rating, Smoke Development, Firewalls, Fire Resistance Ratings	10
3.	Building Fire Safety and Classification Building Height, Size, Spatial Separation, Fire Alarm and Detection Systems, Standpipe and Sprinkler, Systems, Lighting and Emergency Power, High Buildings, Access to Storeys, Routes, Access	13
4.	Occupant Safety Safety within Floors, Assembly Occupancies, Care and Detention, Residential, Industrial	8
5.	Exiting Exit Types, Number, Location & Fire Escapes, Travel Distance & Distance Between Exits, Exit Width, Height and Capacity, Fire Separation of Exits, Exit Signs, Handrails, Guards, Stairs and Ramps, Doors and Hardware, Emergency Access to Floor Areas/Crossover	10
6.	Vertical Transportation & Service Facilities Vertical Transportation and Service Facilities	2
7.	Health Requirements and Accessible Design Plumbing Facilities, Accessible Design	1
8.	Structural Design Structural Design	1
9.	Environmental Separation Heat, Air, Vapour, Moisture, & Sound Ratings	2
10.	HVAC Design and Installation	1
	Total	50

ACBOA Level III - EXAM 9 - LIFE SAFETY SYSTEMS

	LEVEL III, Exam 9 – LIFE SAFETY SYSTEMS	
Two & half hour limit, 50 multiple choice questions, open book.		
	Content Area	Questions
1.	Safety Within Floors	8
	Suite Separation, Means of Egress, Door Requirements & Number	
	Egress Doorways, Corridor Requirements, Ramps, Stairways & Exterior	
	Passageways, Handrails and Guards, Exhaust Ventilation, Janitor and	
	Laundry Rooms	
2.	Assembly Occupancies	6
	Fire Separations, Fixed Seats and Fixed Bench Type Seats, Aisles,	
	Doors, and Corridors, Guards and Risers for Stairs, Stages, Outdoor	
	Places of Assembly	
3.	Care and Detention	8
	Fire Separations, Doors and Corridors, Hospitals and Nursing Homes,	
	Areas of Refuge, Contained Use Areas	
4.	Residential	5
	Fire Separations, Storage Rooms, Egress	
5.	Industrial	4
	Repair and Storage Garages and Separations, Multiple Tenant Self	
	Storage, Vestibules	
6.	Exits	15
	Types, Number & Location of Exits, Travel Distance & Distance	
	Between Exits, Exit Width, Height and Capacity, Fire Separation of	
	Exits, Exit Signs, Handrails and Guards, Stairs and Ramps, Doors and	
	Hardware, Fire Escapes, Emergency Access to Floor Areas/Crossover	
7.	Vertical Transportation	4
	Standards, Fire Separations, Elevators	
	Total	50

	LEVEL III, Exam 10 – FIRE PROTECTION	
	Two & half hour limit, 50 multiple choice questions, open book.	
	Content Area	Questions
1.	Fire Alarm and Detection Systems Fire Alarm Requirements, Continuity Fire Alarm System, Types of Fire Alarms, Installation & Testing, Pull Stations, Annunciator & Zone Indication, Fire Detectors, Audibility, and Visual Requirements, Voice Communications, Smoke Alarms	9
2.	Standpipe and Sprinkler Systems Water Supply, General Standpipe & Sprinkler Requirements, Hose Connections, Hose Stations, Fire Department Connections	7
3.	Lighting and Emergency Power Lighting Requirements, Emergency Lighting and Power	5
4.	High Buildings Application, Fire fighters, elevators, Limits smoke movement, Central Alarm and Control Facility (CACF), Venting	10
5.	Building Fire Safety Exceptions to Building Height, Storage garages, Basements and Storage Below Ground, Streets, Multiple Major Occupancies, Automatic Sprinkler Systems, Construction Requirements, Interconnected Floors, and Mezzanines	13
6.	Access Access to Storeys, Access Routes, Roof Access	6
	Total	50
